I had the opportunity to talk with the technical team at GoToMeeting on Friday.

Nice group of people with a keen ear to listen.

I am current beta testing their latest product, GotoTraining. Very nice package with the following features:

- a) Ability to cut and paste from the discussion thread right into the application on the leaders machine.
- b) Hands up
- c) Voting
- d) Testing
- e) Ability to load documents (e.g., MSWord, Power Point, PDF, etc) to the space in advance of the meeting
- f) Ability to register people in advanced of the session
- g) Run up to 45 people per a session
- h) VoIP for conference portion

I'm running a test this week and then next week with clients.

I'll keep you posted. Looks promising.

Jerry
